

# READ AND ANSWER: PLANTS

Read the text and write answers for the given sections.

## Plants

Plants need sunlight, water, and soil to grow. They use sunlight to make their own food through a process called photosynthesis. Roots anchor the plant in the soil and absorb water and nutrients. Leaves are like tiny solar panels, capturing sunlight to help the plant grow.

### Before reading

What are some things plants need to grow?

### During reading

What process do plants use to make their own food?

### After reading

What part of the plant captures sunlight?
