

PROBLEM AND SOLUTION

Read the given passage. Identify the problem and solution in each case.

Leaving devices plugged in when not in use wastes energy and money. Standby power, or vampire power, is the culprit. The solution? Unplug chargers and electronics or use smart power strips to cut off multiple devices at once. These simple steps reduce energy consumption, lower bills, and contribute to a greener future.

Problem

Solution

Plastic in oceans harms marine life and disrupts ecosystems. The solution is to cut back on single-use plastics and properly dispose of plastic waste. Reusable bags, bottles, and containers can replace disposables, significantly reducing ocean pollution. Supporting beach cleanups also plays a crucial role in preserving our marine environment.
