

MAKING PREDICTIONS

Read the story and choose the correct option to answer the question.

In a lake, there were three fish who were great friends. The first fish was very smart, the second one knew how to find her way out of trouble, and the third was stubborn and hated changes. The first fish overheard a fisherman's conversation about coming back the next day and fishing in the lake. Sensing danger, he cautioned his friends to move out of the lake.

What do you think happened next?

- 1 The first fish moved out of the lake, while the other two didn't.
- 2 The first and second fish moved out of the lake, but the third one didn't.
- 3 None of them moved out and stayed behind.

The second fish said, "I will stay here and find a way out if I'm caught." The third fish said, "I do not want to move out. I will remain here, and if I have to get caught, I will." The first fish moved out. The next day, the fisherman arrived and caught the other two fish. The second one cleverly escaped by pretending to be dead.

What do you think happened to the third fish in the end?

- 1 The third fish managed to escape as well.
- 2 The third fish started flying.
- 3 The third fish got caught and died.
