

# Winter Addition and Subtraction

Solve the following word problems.

- 1 Tommy planned to visit 57 ice sculptures in the city. He visited 25 on the first day and then explored 20 more the next day. How many sculptures does he have left to visit?  
\_\_\_\_\_
- 2 During a winter festival, 60 people attended a concert. If 35 more joined but then 24 left to explore other activities, how many people stayed for the entire concert?  
\_\_\_\_\_
- 3 Sarah took 65 photos on her trip to the snowy mountains. If she took 32 more on the next day but deleted 22 blurry shots, how many photos does she have left?  
\_\_\_\_\_
- 4 Jack had 48 snowflakes on his winter decorations. He added 15 more snowflakes but then removed 36 to rearrange. How many snowflakes are left on the decorations?  
\_\_\_\_\_
- 5 Amy has 100 snowflake stickers. She used 36 stickers for her scrapbook and then got 15 more from her friend. How many snowflake stickers does Amy have now?  
\_\_\_\_\_
- 6 Emily packed 75 pairs of gloves for her winter charity event. She gave away 44 pairs and then bought 35 more on her way. How many pairs of gloves does Emily have now?
