

Associative Property Of Addition

Robin has a penny, a nickel and a dime.

List the different sequences in which robin can put the coins in the piggy bank.

Also, calculate the sum in each case.

Two sequences have been done for you:

$$\text{Penny} + \text{Nickel} + \text{Dime} = 1\text{¢} + 5\text{¢} + 10\text{¢} = 16\text{¢}$$

$$\text{Dime} + \text{Nickel} + \text{Penny} = 10\text{¢} + 5\text{¢} + 1\text{¢} = 16\text{¢}$$

$$\square + \square + \square = \square = \square$$

$$\square + \square + \square = \square = \square$$

$$\square + \square + \square = \square = \square$$

$$\square + \square + \square = \square = \square$$
