

Finding Amount

Write the total amount for each of the given set of bills.

Five one-dollar bills are shown, arranged in two groups. The first group on the left has three bills, and the second group on the right has two bills. Each bill has the word "Sample" written across it in blue. To the right of the bills is a white rectangular box with a blue border.

\$5

Five ten-dollar bills are shown, arranged in two groups. The first group on the left has three bills, and the second group on the right has two bills. Each bill has the word "Sample" written across it in blue. To the right of the bills is a white rectangular box with a blue border.

Three two-dollar bills are shown, arranged in two groups. The first group on the left has two bills, and the second group on the right has one bill. Each bill has the word "Sample" written across it in blue. To the right of the bills is a white rectangular box with a blue border.
