

## Add Fractions

Write a fraction for each model and then find the sum. Also, draw a model for the sum.

$$\frac{\boxed{1}}{\boxed{4}} + \frac{\boxed{2}}{\boxed{4}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} + \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$
