

Balance the Addition

Find the missing numerators to balance the sum on both the sides.

$$\frac{\boxed{2}}{\boxed{9}} + \frac{\boxed{5}}{\boxed{9}} = \frac{\boxed{3}}{\boxed{9}} + \frac{\boxed{}}{\boxed{9}}$$

$$\frac{\boxed{6}}{\boxed{8}} + \frac{\boxed{4}}{\boxed{8}} = \frac{\boxed{}}{\boxed{8}} + \frac{\boxed{5}}{\boxed{8}}$$

$$\frac{\boxed{7}}{\boxed{20}} + \frac{\boxed{9}}{\boxed{20}} = \frac{\boxed{10}}{\boxed{20}} + \frac{\boxed{}}{\boxed{20}}$$

$$\frac{\boxed{2}}{\boxed{11}} + \frac{\boxed{}}{\boxed{11}} = \frac{\boxed{5}}{\boxed{11}} + \frac{\boxed{}}{\boxed{11}}$$
