

Balance the Subtraction

Find the missing numerators to balance the result on both the sides.

$$\frac{5}{9} - \frac{2}{9} = \frac{7}{9} - \frac{\square}{9}$$

$$\frac{6}{8} - \frac{4}{8} = \frac{\square}{8} - \frac{7}{8}$$

$$\frac{10}{20} - \frac{4}{20} = \frac{6}{20} - \frac{\square}{20}$$

$$\frac{9}{11} - \frac{\square}{11} = \frac{10}{11} - \frac{\square}{11}$$
