

Estimate the Sum Using Benchmark Fractions and Models

Write a fraction for each model. Compare the addends with the benchmark fraction. Estimate if the sum is greater than, less than or equal to 1.

$\frac{\square}{\square} \frac{\square}{\square} \frac{1}{2}$
 $\frac{\square}{\square} + \frac{\square}{\square}$
 $\frac{\square}{\square} \frac{\square}{\square} \frac{1}{2}$

$\frac{\square}{\square} \frac{\square}{\square} \frac{1}{2}$
 $\frac{\square}{\square} + \frac{\square}{\square}$
 $\frac{\square}{\square} \frac{\square}{\square} \frac{1}{2}$
