

Dice Roll 4-Digit Division Fun

- Roll two dice. Find the corresponding numbers in columns A and B.
- Divide A by B and mark the quotient in the grid.
- Complete a row or a column to win!

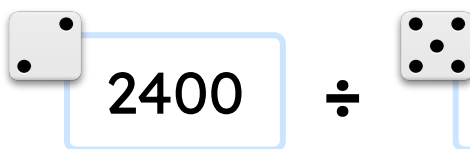

Column A

1	1200
2	2400
3	3600
4	4800
5	9600
6	7200

Column B

1	10
2	12
3	20
4	30
5	40
6	60

Example

$$2400 \div 40 = 60$$

360	300	180	160	960	80	60
40	800	320	200	480	720	100
240	600	90	120	400	20	30
