

Dice Roll Division Fun

- Roll two dice. Find the corresponding numbers in columns A and B.
- Divide A by B and mark the quotient in the grid.
- Complete a row or a column to win!

Column A

1	120
2	240
3	360
4	480
5	960
6	720

Column B

1	10
2	12
3	20
4	30
5	40
6	60

Example

$$240 \div 40 = 6$$

36	30	18	16	96	8	6
4	80	32	20	48	72	10
24	60	9	12	40	2	3
