

Summer Division

Solve the following word problems.

1 At a summer camp, there are 325 kids. If there are 5 counselors, how many kids are with each counselor?

2 On a hot summer day, a lemonade stand sold 567 cups of lemonade. If they sold the same amount of cups every hour for 9 hours, how many cups did they sell each hour?

3 A family is going on a summer road trip. They plan to drive 864 miles and want to split the drive evenly over 6 days. How many miles will they drive each day?

4 A summer school has 456 students and they want to divide them into groups of 8 for a project. How many groups will there be?

5 During a summer fair, 675 tickets were sold. If each person bought 5 tickets, how many people attended the fair?

6 A beach has 980 seashells. If 7 children each collect an equal number of seashells, how many seashells will each child collect?

7 A summer camp has 416 water balloons for a water balloon fight. If they want to divide the water balloons equally among 8 teams, how many water balloons will each team get?
