

Winter Division

Solve the following word problems.

1 In the winter, a snow removal company clears 750 driveways in a week. If they have 25 snowplows, how many driveways does each snowplow need to clear?

2 A ski resort has 216 pairs of skis to rent out. If they have 24 rental stations, how many pairs of skis does each rental station have?

3 A winter festival sold 900 tickets. If the tickets were sold equally by 30 volunteers, how many tickets did each volunteer sell?

4 Sarah bought 648 candy canes for a winter event. If she plans to pack them into boxes, putting 18 candy canes in each box, how many boxes will she fill?

5 A group traveled 864 miles across snowy regions for a winter expedition. If they aim to cover this distance equally in 12 days, how many miles will they travel each day?

6 A town decorates 525 trees with Christmas lights. If 15 volunteers share the work equally, how many trees does each volunteer decorate?

7 A bakery made 216 gingerbread cookies for a winter festival. If they have 27 trays, how many cookies does each tray hold?
