

Subtract Fractions from Mixed Numbers

Draw the models for the given mixed numbers. Then subtract the fractions to find the answer.

$$\boxed{3} \frac{\boxed{1}}{\boxed{5}} - \frac{\boxed{4}}{\boxed{5}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

$$\boxed{2} \frac{\boxed{3}}{\boxed{6}} - \frac{\boxed{4}}{\boxed{6}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$
