

Estimate Product of Whole Numbers

Round the second number to the nearest 10 to estimate the products.

$$7 \times 42 \approx \square \times \square = \square$$

$$8 \times 36 \approx \square \times \square = \square$$

$$9 \times 48 \approx \square \times \square = \square$$

$$3 \times 51 \approx \square \times \square = \square$$

$$4 \times 32 \approx \square \times \square = \square$$
