

## Estimating Sum/Difference

Round off the numbers and find the estimated sum/difference.

Estimate the sum.

$3,854 + 6,028$

$\longrightarrow \boxed{\phantom{0000}} + \boxed{\phantom{0000}} = \boxed{\phantom{0000}}$

$8,322 + 1,103$

$\longrightarrow \boxed{\phantom{0000}} + \boxed{\phantom{0000}} = \boxed{\phantom{0000}}$

$67,551 + 85,302$

$\longrightarrow \boxed{\phantom{000000}} + \boxed{\phantom{000000}} = \boxed{\phantom{000000}}$

$10,364 + 59,493$

$\longrightarrow \boxed{\phantom{00000}} + \boxed{\phantom{00000}} = \boxed{\phantom{00000}}$

$94,650 + 2,113$

$\longrightarrow \boxed{\phantom{000000}} + \boxed{\phantom{000000}} = \boxed{\phantom{000000}}$

Estimate the difference.

$9,493 - 2,324$

$\longrightarrow \boxed{\phantom{00000}} - \boxed{\phantom{00000}} = \boxed{\phantom{00000}}$

$5,036 - 1,945$

$\longrightarrow \boxed{\phantom{00000}} - \boxed{\phantom{00000}} = \boxed{\phantom{00000}}$

$68,931 - 11,585$

$\longrightarrow \boxed{\phantom{000000}} - \boxed{\phantom{000000}} = \boxed{\phantom{000000}}$

$74,832 - 15,002$

$\longrightarrow \boxed{\phantom{000000}} - \boxed{\phantom{000000}} = \boxed{\phantom{000000}}$

$35,846 - 5,394$

$\longrightarrow \boxed{\phantom{000000}} - \boxed{\phantom{000000}} = \boxed{\phantom{000000}}$
