# Estimate the Sum Using Benchmark Fractions and Models

Write a fraction for each model. Compare the addends with the benchmark fraction. Estimate if the sum is greater than, less than or equal to 1.

$$\frac{\square}{\square} + \frac{\square}{\square}$$

$$\frac{\square}{\square} \quad \boxed{} \quad \frac{1}{2}$$

$$\frac{\square}{\square} \quad \boxed{} \quad \frac{1}{2}$$

The sum is greater than 1

$$\frac{\square}{\square} + \frac{\square}{\square}$$

$$\frac{\square}{\square} \quad \boxed{} \quad \frac{1}{2}$$

$$\frac{\square}{\square} \quad \boxed{} \quad \frac{1}{2}$$
