

Event Planner's Division

Your school is planning a fun fair, and you're in charge of distributing items equally.

Challenge

Answer the following questions.

1. Your school received 372 T-shirts for the event. If there are 24 students in each class, how many classes can receive an equal number of T-shirts, and how many T-shirts will be left over?

Number of classes: _____ **T-shirts left over:** _____

2. There are 468 gift bags to be distributed among 36 groups of volunteers. How many gift bags does each group get?

Answer: _____

3. For the event, 456 water bottles were supplied, and they need to be distributed evenly among 19 classes. How many water bottles will each class get?

Answer: _____

4. There are 782 cupcakes that need to be equally distributed into 34 students. How many cupcakes will each student get?

Answer: _____
