

# Find the Missing Number

Use the associative property of multiplication to find the missing numbers.

•  $\underline{5} \times (4 \times 3) = (5 \times \underline{4}) \times 3 = \boxed{60}$

•  $\underline{\quad} \times (10 \times 4) = (2 \times \underline{\quad}) \times 4 = \boxed{\quad}$

•  $(2 \times 6) \times \underline{\quad} = 2 \times (\underline{\quad} \times 5) = \boxed{\quad}$

•  $9 \times (\underline{\quad} \times 1) = (\underline{\quad} \times 4) \times 1 = \boxed{\quad}$

•  $(\underline{\quad} \times 3) \times 9 = 2 \times (\underline{\quad} \times 9) = \boxed{54}$
