

Multiplication Expression!

Write multiplication expression for each scenario.
Also, find the product.

- Sarah has 5 boxes of pencils, and there is 1 pencil in each box. How many pencils does Sarah have in total?

$$\square \times \square = \square \text{ pencils}$$

- A farmer has 8 fields, and he decides not to plant anything in any of the fields. How many crops will grow in the fields?

$$\square \times \square = \square \text{ crops}$$

- A gardener is planting rows of flowers. If he plants a flower in each of the 7 rows, how many flowers has he planted?

$$\square \times \square = \square \text{ flowers}$$

- There are 10 shelves in a library, and there is nothing on any shelf. How many books are there in total on the shelves?

$$\square \times \square = \square \text{ books}$$
