

# Interpret the Word Problems

Match each number on the left to its possible meaning on the right based on the given context.

*Emily bought some corn seeds to plant in two fields. She wants to plant all the seeds over two consecutive days. To keep track of the seeds, she writes the expression  $324 - 120$  after day 1.*

324

The number of corn seeds Emily planted on day 1.

120

The number of corn seeds Emily is left with for day 2.

204

The total number of corn seeds Emily bought.
