

Halloween Multiplication

Solve the following word problems.

1 A halloween store has 125 different types of masks. If each type of mask comes in 3 different sizes, how many different masks are there in total?

2 A candy factory produces 346 candies each hour. How many candies does the factory produce in 7 hours?

3 A halloween store sold 6 packs of glow-in-the-dark stickers. Each pack contains 101 stickers. How many stickers did the store sell?

4 A halloween decorations factory created 450 bat decorations each day for 9 days leading up to halloween. How many bats did they create in total?

5 A haunted house attraction charges 250 tickets per person. If 8 people went to the attraction, how many tickets were collected in total?

6 A halloween candy factory produces 432 lollipops per hour. If it operates for 6 hours a day, how many lollipops does it produce in a day?

7 A farm produces 270 pumpkins for halloween. How many pumpkins will be produced by 9 such farms?

8 A halloween fair has 132 visitors in the morning. Each guest gets 3 free tickets at the entry. How many free tickets are distributed in total?
