

Winter Multiplication

Solve the following word problems.

- 1 During the winter break, a ski resort rents out 123 pairs of skis each day. If the resort is open for 45 days, how many pairs of skis does it rent out in total?

- 2 A winter fair sells 234 cups of hot chocolate each day for 12 days. How many cups of hot chocolate are sold in total?

- 3 A festival sold 320 tickets for a winter concert, with each ticket priced at \$15. How much money did they make from ticket sales?

- 4 A school arranged 185 rows of 14 snowflakes each for decoration. How many snowflakes were used in total?

- 5 A ski resort has 167 ski instructors. Each instructor gives 24 lessons during the winter season. How many lessons are given in total?

- 6 A company produced 35 sleds, and each sled required 195 bolts. How many bolts were used for all the sleds?

- 7 A winter sports store sells 432 snowboards each month for 12 months. How many snowboards does the store sell in total?

- 8 A store packed 205 sets of winter gear, with each set including 14 items. How many items were packed in total?
