

NAME _____

Christmas Multiplication

Solve the following word problems.

1 Santa Claus is packing gifts for children. Each gift weighs 0.75 lb. If he packs 8 gifts in a sack, how much does the sack weigh?

2 In a Christmas sale, a shop is selling decorative lights for \$2.50 each. If a customer buys 7 lights, how much will he pay?

3 Each Christmas tree ornament weighs 0.35 lb. If a Christmas tree has 9 ornaments, what is the total weight of the ornaments?

4 A Christmas cake weighs 1.25 lb. If a bakery makes 6 such cakes, what is the total weight of the cakes?

5 A Christmas card costs \$1.50. If John buys 10 cards, how much does he pay?

6 Each Christmas stocking weighs 0.45 lb. If a fireplace has 5 stockings, what is the total weight of the stockings?

7 Each Christmas tree at a farm costs \$15.75. If a customer buys 6 trees, how much will the customer pay?

8 A Christmas wreath costs \$3.75. If a customer buys 4 wreaths, how much will she pay?

9 Each Christmas candle weighs 0.85 lb. If a table has 3 candles, what is the total weight of the candles?
