

Summer Multiplication

Solve the following word problems.

1 At a summer fair, a lemonade stand sells a glass of lemonade for \$2.50. If they sell 12 glasses in an hour, how much money do they make?

2 A family goes to a summer beach resort where the entrance fee is \$4.75 per person. If 8 family members go, how much is the total entrance fee?

3 A summer camp has planned a trip to a water park. The ticket price is \$5.50 per child. If 15 children are going, how much will the tickets cost in total?

4 A summer fruit stall sells one pound of mangoes for \$3.20. If the stall sold 17 pounds in a day, how much money did the stall make?

5 A beach shop sells a summer hat for \$7.50. If they sold 11 hats in a day, how much money did they make?

6 A summer ice cream truck sells each ice cream cone for \$1.75. If they sold 33 cones in an hour, how much money did they make?

7 A summer fair game costs \$2.25 to play. If 14 people played the game, how much money was collected?
