

Party Money Problems

Read each of the word problems and choose an expression that will help you solve this problem.

- Each party hat costs \$2. If Anna buys 15 hats, how much does she spend?

2×15

$2 \div 15$

- A balloon costs \$1.50. If Mike buys 20 balloons, how much does he spend?

$1.50 \div 20$

1.50×20

- You have \$60 and each gift bag costs \$3. How many gift bags can you buy?

60×3

$60 \div 3$

- A piñata costs \$18. If you have \$72, how many piñatas can you buy?

$72 \div 18$

72×18
