

Adding Fractions in Real-Life

Food items were divided into equal parts as shown. Oolzoo and Blu ate some parts. Use the models to find what fraction of each food item did they eat altogether.

I ate $\frac{1}{6}$ of the pizza.

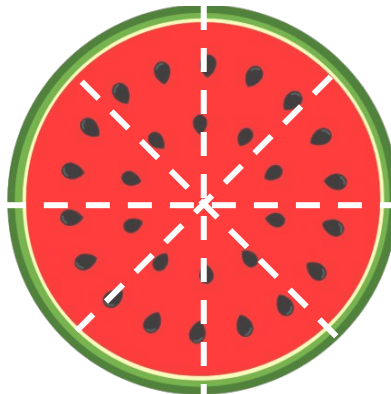

I ate $\frac{2}{6}$ of the pizza.

$$\frac{1}{6} + \frac{2}{6} = \boxed{\quad}$$

I ate $\frac{2}{8}$ of the watermelon.

I ate $\frac{4}{8}$ of the watermelon.

$$\frac{2}{8} + \frac{4}{8} = \boxed{\quad}$$
