

Skip Count and Complete the Path

Color the correct star in the given path to complete skip counting by 10s.

A path of stars is shown on a sandy surface. The path starts at a yellow star with the number 10. It then branches into two paths. The upper path consists of stars with numbers 30, 20, 30, 40, 70, and 90. The lower path consists of stars with numbers 60, 10, 70, 50, 30, 100, 50, 80, 90, and 60. The stars are arranged in a way that suggests a sequence of numbers to be counted by 10s.
