

## Solve Equal Sharing Scenarios

Use the number line to solve the given problems.

9 crayons are divided equally in 3 groups. How many crayons will be there in each group?

$$\boxed{9} \div \boxed{3} = \boxed{\phantom{00}} \text{ crayons in each group}$$

8 jellies are divided equally in 4 groups. How many jellies will be there in each group?

$$\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}} \text{ jellies in each group}$$

12 balls are divided equally in 2 groups. How many balls will be there in each group?

$$\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}} \text{ balls in each group}$$
