

Choose Your Numbers to Solve

Choose any numbers to complete the word problems and then solve it.

Do not use the same number twice.

Kevin buys packs of balloons. Each pack has balloons.

How many balloons does Kevin buy?

$$\boxed{} \times \boxed{} = \boxed{} \text{ balloons}$$

Lucy arranged some bottles in rows. Each row has bottles. How many bottles did Lucy use?

$$\boxed{} \times \boxed{} = \boxed{} \text{ bottles}$$

Charlie has roses. Diana has times as many roses as Charlie in her garden. How many roses does Diana have in her garden?

$$\boxed{} \times \boxed{} = \boxed{} \text{ roses}$$
