

## Solve the Word Problems

Read the word problems and write them correctly in the model and in the equation.

Michael bought 18 presents for friends and family.  
 He gave 6 of them to his brother.  
 Then he gave 5 of them to his sister.  
 How many presents are left with Michael?  
 Solve the first mystery and then the second mystery.

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
----------------------	----------------------	----------------------	----------------------	----------------------

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
----------------------	----------------------	----------------------	----------------------	----------------------

Michael is left with  presents.

Carl had 2 boxes of crayons with 6 crayons in each box.  
 He got 5 more crayons from his brother.  
 How many crayons does he have now?
