

## Divide Decimals Using Standard Algorithm

Divide and find the quotient.

1

$$\boxed{0.176} \div \boxed{0.16} = \boxed{\phantom{00}}$$

**STEP 1:** Multiply by powers of 10, to make the divisor a whole number.

$$\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

**STEP 2:** Divide the numbers without the decimal point and then adjust the decimal point.

$$16 \overline{) 176}$$
