

## Subtract Fractions

Subtract the fractions from the whole.

$$\boxed{1} - \frac{\boxed{4}}{\boxed{7}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\boxed{1} - \frac{\boxed{3}}{\boxed{11}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\boxed{1} - \frac{\boxed{5}}{\boxed{15}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\boxed{1} - \frac{\boxed{4}}{\boxed{9}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\boxed{1} - \frac{\boxed{9}}{\boxed{10}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\boxed{1} - \frac{\boxed{1}}{\boxed{3}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\boxed{1} - \frac{\boxed{5}}{\boxed{6}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

$$\boxed{1} - \frac{\boxed{4}}{\boxed{14}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$
