# Use Models to Subtract Fractions

Find the difference by representing fractions on the models as directed.
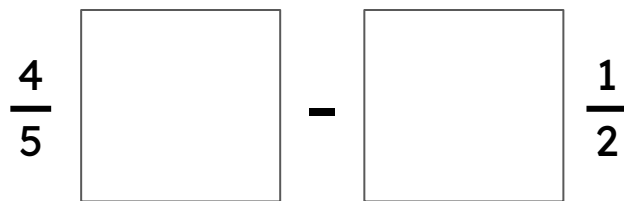

$$\frac{2}{3} - \frac{1}{4} = \boxed{}$$

$\frac{2}{3}$ — $\frac{1}{4}$

Equivalent fraction with common denominator

$$\frac{4}{5} - \frac{1}{2} = \boxed{}$$

$\frac{4}{5}$ — $\frac{1}{2}$

Equivalent fraction with common denominator
