

Subtract Unlike Mixed Numbers

Fill the blanks with the numbers that solve the subtraction expression correctly. Take help of the solved example.

1

$$\boxed{6} \frac{\boxed{1}}{\boxed{4}} - \boxed{3} \frac{\boxed{2}}{\boxed{5}} = \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}}$$

$$= \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

2

$$\boxed{4} \frac{\boxed{2}}{\boxed{3}} - \boxed{1} \frac{\boxed{7}}{\boxed{9}} = \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}}$$

$$= \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$
