

# Find the Missing Fraction

Find the missing fraction to convert each improper fraction into a mixed number.

$$\frac{\boxed{9}}{\boxed{4}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} + \frac{\boxed{1}}{\boxed{4}} = \boxed{2} \frac{\boxed{1}}{\boxed{4}}$$

$$\frac{\boxed{8}}{\boxed{3}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} + \frac{\boxed{2}}{\boxed{3}} = \boxed{2} \frac{\boxed{2}}{\boxed{3}}$$

$$\frac{\boxed{7}}{\boxed{2}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} + \frac{\boxed{1}}{\boxed{2}} = \boxed{3} \frac{\boxed{1}}{\boxed{2}}$$
