

Find the Fractional Part

Find the missing fraction to convert each improper fraction into a mixed number.

$$\frac{\boxed{9}}{\boxed{5}} = \frac{\boxed{5}}{\boxed{5}} + \frac{\boxed{4}}{\boxed{5}} = \boxed{1} \frac{\boxed{}}{\boxed{}}$$

$$\frac{\boxed{12}}{\boxed{7}} = \frac{\boxed{7}}{\boxed{7}} + \frac{\boxed{5}}{\boxed{7}} = \boxed{1} \frac{\boxed{}}{\boxed{}}$$

$$\frac{\boxed{10}}{\boxed{4}} = \frac{\boxed{8}}{\boxed{4}} + \frac{\boxed{2}}{\boxed{4}} = \boxed{2} \frac{\boxed{}}{\boxed{}}$$
