

# Convert the Improper Fraction

Find the missing fraction to convert each improper fraction into a mixed number.

$$\frac{9}{2} = \frac{8}{2} + \frac{1}{2} = \square \frac{1}{2}$$

$$\frac{10}{3} = \frac{9}{3} + \frac{1}{3} = \square \frac{1}{3}$$

$$\frac{7}{4} = \frac{4}{4} + \frac{3}{4} = \square \frac{3}{4}$$
