

# Find the Missing Fraction

Find the missing fraction to convert each improper fraction into a mixed number.

$$\frac{\boxed{7}}{\boxed{3}} = \frac{\boxed{6}}{\boxed{3}} + \frac{\boxed{\phantom{0}}}{\boxed{\phantom{0}}} = \boxed{2} \frac{\boxed{1}}{\boxed{3}}$$

$$\frac{\boxed{10}}{\boxed{4}} = \frac{\boxed{8}}{\boxed{4}} + \frac{\boxed{\phantom{0}}}{\boxed{\phantom{0}}} = \boxed{2} \frac{\boxed{2}}{\boxed{4}}$$

$$\frac{\boxed{12}}{\boxed{5}} = \frac{\boxed{10}}{\boxed{5}} + \frac{\boxed{\phantom{0}}}{\boxed{\phantom{0}}} = \boxed{2} \frac{\boxed{2}}{\boxed{5}}$$
