

Multiply Fractions by Whole Numbers

Write the missing whole number to complete the multiplication.

$$\frac{5}{2} \times \square = \frac{25}{2}$$

$$\frac{2}{11} \times \square = \frac{18}{11}$$

$$\frac{1}{5} \times \square = \frac{3}{5}$$

$$\frac{13}{4} \times \square = \frac{91}{4}$$

$$\frac{7}{2} \times \square = \frac{49}{2}$$

$$\frac{6}{7} \times \square = \frac{54}{7}$$
